

# THE SOLOMON PROJECT

Decentralized ecommerce for the DeFi era.

## WHY SOLOMON

The mission of the Solomon Project is to bring about the mainstream adoption of online cryptocurrency payments.

Solomon combines decentralized finance with the traditional ecommerce protections demanded by consumers.

### Open

All of the benefits of cryptocurrency payments.

### Secure

Decentralized chargebacks protect both parties from fraud.

### DeFi

100% owned and maintained by the community.

**Payment Method**

## THE SOLOMON PLUGIN

The Solomon Plugin will be an easy, open-source way for any entrepreneur to accept cryptocurrency while inspiring confidence for customers.

### Consumer Protections

Consumers receive the same protections they demand from credit cards, such as chargebacks.

### Merchant Benefits

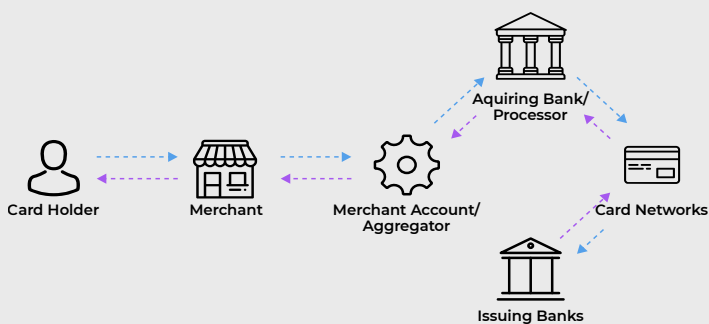

Merchants enjoy fewer barriers, lower fees, and innovative smart contracts that enable preorders and escrow.

### Community Owned

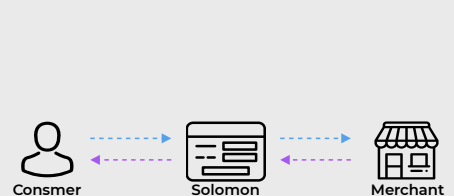

Users earn on-demand income for settling chargeback disputes while stakers collect plugin revenues.

## TRADITIONAL ECOMMERCE VS DECENTRALIZED ECOMMERCE (DeCom)

### Credit Card Processing

### Solomon Payments

## The SLM Token

Witness the emergence of Decentralized Ecommerce (DeCom).
